20th November 2020

FOR DIRECT CLOSE CONTACTS OF A CONFIRMED CASE OF COVID 19 at St Margaret's CE Primary School

Advice to Self-Isolate until 30th November

Dear parent/carer

We have been advised by Public Health England that a child has tested positive for COVID-19 within the school.

We have followed the national guidance and have identified that your child has been in close contact with the affected person. In line with the national guidance your child should now stay at home and self-isolate until 30th November 2020, which is 14 days since they were last in contact with the confirmed case. Their first day back in school will be on Tuesday 1st December after half-term.

We are asking you to do this to reduce the further spread of COVID 19 to others in the community.

If your child is well at the end of the period of self-isolation, then they can return to usual activities. A negative test does not mean that your child may return to school earlier than the period of self-isolation.

Other members of your household can continue normal activities provided you do not develop symptoms within the self-isolation period.

Please see the link to the PHE Staying at Home Guidance

<https://www.gov.uk/government/publications/covid-19-stay-at-home-guidance/stay-at-home-guidance-for-households-with-possible-coronavirus-covid-19-infection>

What to do if you develop symptoms of COVID 19

If you or your child develop symptoms of COVID-19, you should remain at home for at least 10 days from the date when symptoms appeared as advised in <https://www.gov.uk/government/publications/covid-19-stay-at-home-guidance>

You should arrange for testing for yourself via <https://www.gov.uk/guidance/coronavirus-covid-19-getting-tested> or 111.nhs.uk or primary care

All other household members who remain well must stay at home and not leave the house for 14 days.

The 14-day period starts from the day when the first person in the house became ill.

Household members should not go to work, school or public areas and exercise should be taken within the home.

Household members staying at home for 14 days will greatly reduce the overall amount of infection the household could pass on to others in the community

If you are able to, move any vulnerable individuals (such as the elderly and those with underlying health conditions) out of your home, to stay with friends or family for the duration of the home isolation period

Symptoms of COVID 19

The most common symptoms of coronavirus (COVID-19) are recent onset of:

- new continuous cough and/or
- high temperature and/or
- a loss of, or change in, normal sense of taste or smell (anosmia)

For most people, coronavirus (COVID-19) will be a mild illness.

If you do develop symptoms, you can seek advice from NHS 111 at <https://www.nhs.uk/conditions/coronavirus-covid-19/check-if-you-have-coronavirus-symptoms/> or by phoning 111.

How to stop COVID-19 spreading

There are things you can do to help reduce the risk of you and anyone you live with getting ill with COVID-19:

- wash your hands with soap and water often – do this for at least 20 seconds
- use hand sanitiser gel if soap and water are not available
- wash your hands as soon as you get home
- cover your mouth and nose with a tissue or your sleeve (not your hands) when you cough or sneeze
- put used tissues in the bin immediately and wash your hands afterwards

Further Information

Further information is available at <https://www.nhs.uk/conditions/coronavirus-covid-19/>

Yours sincerely,

Mr D Whittle
